Evaluations for Amanda and Maryssa

Yesterday I had a meeting to go over the results of the evaluations for Amanda and Maryssa with Ronita Van Vliet, Mrs Crabtree, the school psychologist Wendy Myers, Amanda's caseworker for Early Start Services-Laura Beech and Maryssa's case worker for her early intervention services-Melanie Bakken.

The results were that Amanda averaged 3.3-3.7 years developmentally. She does not need to attend not qualifies for special education The school district and Early Start wanted to do a global evaluation on her because of her disability of her club radial hand. No concerns academically or developmentally. Just continued OT for her right hand and arm.

Maryssa's results were 2.1-2.4 years developmentally with a delay in receptive language. Her expressive language has been catching up and I contribute my hard work with Maryssa and Maryssa currently receiving speech therapty once a week at the house. Maryssa will continue to receive speech therapy twice a week for 3 minutes each session at Jordan Elementary School. Maryssa did not qualify for Ronita Van Vliet's special education class that Savannah had been attending these past 2 years. Maryssa would have needed to be delayed in more than one year of just receptive language. So I guess this is good news for Maryssa!! Yay!!

So, tomorrow I will confirm registration for the triplets to attend preschool together at Presbyterrian Hills Preschool near our house. They will go Tuesday and Thursday mornings beginning in the Fall.
