CCS (California Children Services) for Amanda

On Wednesday, September 13th, Amanda had an evaluation for Occupational Therapy at Woodcrest with a wonderful therapist named Michelle. I took all of the triplets. The evaluation went from 11am-1:00pm. Amanda will be receiving Occupational Therapy after her thumb reconstruction surgery, probably at the end of October or early November. She will be going once a week for 45 minutes. The facility is located in Fullerton. Our goals for Amanda will be to work on her fine motor skills, helping her find her center line since one arm is slight shorter than the other, helping her button, zip, etc.

Amanda was receiving Physical Therapy and Occupational Therapy from Regional Center of Orange County, a non-profit organization that offers in-home therapy for children 3 and under that are developmentally behind. Amanda was evaluated in June by Kim, her physical therapist, and the report stated Amanda was no longer delayed and was developmentally at her age. The occupational therapist, Deborah, will be evaluating Amanda this week and she will be report that Amanda is no longer delayed and is developmentally at the correct age now. This is such a huge and wonderful goal that Amanda has met. She was receiving therapy since she was just a few months old.
