# Guess how big Savannah is?

When I took Savannah to her 5 year physical they measured her and weighed her. She is now 39.5 pounds and she is 42 inches tall. My scale at home says 37.5-38 pounds. I am thinking the clothes she was wearing might have made her 39.5 pounds.

She now is in a Booster Car seat. We got her a cute pink Graco Turbo Booster and she says she is so comfortable in it. She has a hard time getting the seat belt around and buckled in and I have to help her with that.

She now is too tall for 4T and is now wearing 5T clothes. She is tall and thin just like her daddy. She is growing up to be such a beautiful little girl!!
