Savannah's 6th annual physical checkup

She is 41 lbs with clothes on and 42 inches tall. She is 25% in height and 50% in weight. The Dr. says perfect. She said they are happy to see skinny kids than overweight kids. Ummm ok....

The Dr. noticed Savannah's ear is a little pink and prescribed antibiotics for possible ear infection brewing.

I told the dr. about the nurse's findings about Savannah's left ear. They did a hearing check and she passed.

I also told the dr. about Savannah getting glasses and I want a second opinion with the Pediatric Ophthalmologist, Dr. Fierson. Savannah did her vision test with the dr. and her right eye didn't pass. The dr. will refer Savannah to Dr. Fierson.

The dr. kept asking Savannah what her favorite vegetable was and Savannah said she liked bananas. Then the dr. asked Savannah, what about leafy green vegetables? Savannah looked at her like...what are talking about? LOL!! I mentioned Savannah likes salad and Savannah said, oh yes I love salad.

Best news of all at the appointment-NOT VACCINATION SHOTS!! woo hoo!
