Goop and ouchie ears

This morning Amanda and Savannah woke up with green, weepy, swollen and goopy eyes. I had to wash their eyes with a warm, soft wash cloth. Amanda was tugging at her ear. Uh oh...are we dealing with an ear infection AND pink eye?

I took the girls to the dr. today. Yep, they have conjunctivitis in their eyes and the doctor prescribed antibiotic eye drops and antibiotics for Amanda's ear infection.

The dr. noticed Savannah had a little scar tissue in her ears and asked if Savannah had a lot of ear infections when she was a baby - nope, not that I can recall. I recall RSV followed with asthma related lung issues.

It is looking like all of the girls are starting to catch this respiratory virus - aack!
