Savannah's Pearly Whites

Last month Savannah bumped into a friend and loosened her top tooth. We took her to my Uncle Ned, who is a Pediatric Dentist out in Manhattan Beach. He took X-Rays and said hopefully it would tighten up and may turn a little yellow. It did turn a little yellow and hasn't gotten completely white again. It is finally tightening up though. Now her 2 lower bottom teeth are loose. I don't think she bumped these teeth and I am wondering if her 2 bottom teeth are loosening naturally.
